

BuildLink App Development January Checklist

Objective	Have the platform functioning smoothly on a fundamental level. (Live MVP 2.0)
Expected Result	Basic optimum user experience (Access. Sign in. Build. Upload. Create. Explore. Connect.) The cycle continues.

KEY

	Incomplete
	Pending
	Tackled

The tasks are in order of priority

Timeline: 30 days

FEATURE	URGENT FIX (PROBLEM)	EXPECTED OUTCOME		DEVELOPER
User Accounts	Confused dark mode implementation. Switching between core screens causes glitches – abrupt dark mode deactivations.	Consistent dark mode implementation, with regard to both the colour scheme and activation.		*
Core Screen: Home Feed	Disabled count & registering of the content engagement features (like, share, comment) when active	Real time count of the content engagement features (like, comment, share) when active		Josiah / Francis
	Ineffective media upload/interaction	Stable and consistent media uploading/interaction mechanics		
	Unknown or non-existent gig/job matching user flow functionality	Active and smooth gig/job matching user flow		
Core Screen: Post Creation	Limited UI/UX design	Updated and smooth UI/UX design		
Core Screen: Resource Hub	Incomplete banner	Polished Resource Hub UI		
Core Screen: User Profile Board	Not fully polished UI/UX design of the User Profile Board screen for all 3 user account types (student, professional, company)	Polished User Profile Boards that reflect necessary structure (sections), preferred content and appropriate colour schemes . This obviously applies to both		

		public profile view and private profile view. For the Portfolio Section, enable a lean and smooth pdf viewer & image carousel for users to interact with		
Messaging System	Updated UI/UX design still in need of final polish	Polished, lean & smooth functioning messaging system		Francis
Notifications System	Existing but faulty notifications system	Smooth functioning real time push notifications and notification categorization		Josiah
General Mobile Responsiveness	Bottom navigation bar responsiveness	Seamless bottom navigation bar responsiveness		
	Top header content/icon positioning (Admin user account)	Neat and visible icons on top header (Admin user account)		
	Account settings icon visibility (Admin account)	Visible account settings icon (Admin user account)		
	Media uploading & viewing mechanics	Smooth media viewing and interaction		
	Floating action button mechanics (messaging)	Flexible (not permanent) but anchored floating action button
